Easy application

Place 2 strips in the brood chamber
One of them between frames 3 and 4;
the other between frames 7 and 8

Dosage

Number of Frames covered by bees	<5	6-10	11-15	>16
Number of Strips	1	2	3	4

MEDLIN™
Animal health & nutrition

HEALTH | Synthetic external antiparasitic

Product composition

Each strip of 12,3 g. contains:

Coumaphos	8,5 %
Formulation agents Qs.	100 %

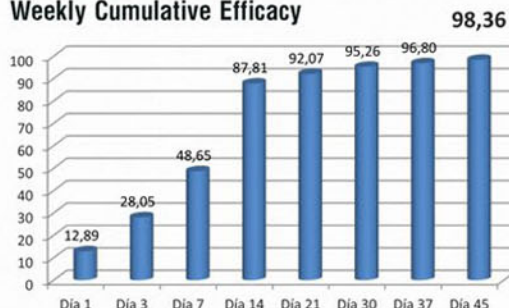

Phosphorothioate acaricide contained in slow-release plastic strips. Ideal for applying at the end of the harvest period. Excellent complement to the rotation with other active ingredients.

On Beekeeping, it allows varroosis control, as well as the elimination of the small hive beetle (*Aethina tumida*).

PHARMACEUTICAL FORM AND PRESENTATION CHARACTERISTICS OF PACKAGING, INVIOABILITY SYSTEM AND CONTENT

This product is presented in polymer plastic strips, vacuum packed, thermo sealed seams and attached label, containing 50 strips. This system allows the product inviolability conditions and ensures optimum preservation until expiry date.

Weekly Cumulative Efficacy
