HEALTH | Synthetic external antiparasitic

Product composition

Each 100 g. strip contains:

Amitraz	4.13 %
Formulation agents Qs.	100 %

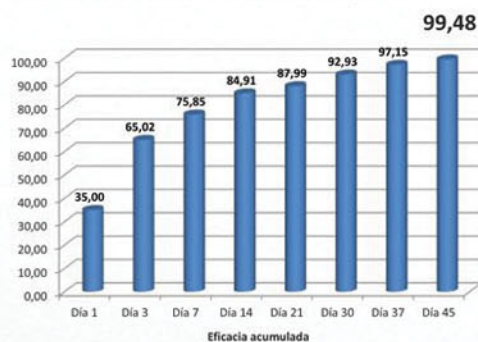

Slow-release plastic strips, containing amitraz, for Varroa control on beehives. The permanence of this product for 45 days, allows administering treatments even in populated beehives and in a period of time where beehives show major activity.

PHARMACEUTICAL FORM AND PRESENTATION CHARACTERISTICS OF PACKAGING, INVOLABILITY SYSTEM AND CONTENT

This product is presented in PVC strips inside dark envelopes preventing the passing of light, with thermo sealed seams. This system allows the product involability conditions and ensures optimum preservation until expiry date.

Weekly Cumulative Efficacy

Results of different performance testing, conducted on field in different regions.

Graphic: Accumulated Efficacy of Amiwar500AR, in beehives from Tandil, Argentina (2014).
